Laser welding machine

- Laser welding machine adopts advanced fiber laser welding technology, provides stable and efficient welding effect, and users can easily master it.
- 4 in 1 laser welding machine is used for welding, cutting, cleaning and cleaning after welding function.
- It is suitable for processing metal, such as SS, aluminum and carbon steel, etc.

Technical parameter

Laser Source	Raycus laser source
Power	1000W 1500W 2000W 3000W
System	Raytools fourin one control system
Welding head	Raytools welding head
Nozzles	Raytools nozzles
Fiber optic cable length	10M
Wire feeder	Raytools Single wire feeding and single pendulm
Water chiller	TEYU RMFL-1000W(1500W/2000W/3000w) water chiller
System language	English
Voltage	220V/1ph/50hz 380V/3P/50Hz(3000W)
Packaging	Export standard wooden box

Application
